

Fantasy World Hexagonal Tiles

Set of hexagonal tiles designed for game developers to create a world with a hexagonal grid system. The tiles are visually appealing and can be used to create diverse environments such as forests, deserts, mountains, and cities. Each tile seamlessly fits with the neighboring tiles and can be easily snapped together to create complex and detailed game levels. The set includes a range of terrain types, including grass, sand, rocks, as well as various decorative elements and buildings to add more detail to the world. The asset is ideal for creating turn-based strategy games, board games, or any game that requires a hexagonal grid system.

Contains:

- 10 terrain types
- 21 pre-made tiles
- 15 Landmarks
- 5 Natural Resources

Features:

- Various Landmarks
- High Definition Tiles 1024x1024
- Pre-made and customisable tiles
- Hundreds of possible combinations

Number of Textures: 51

Texture Resolutions: 1024x1024, 1126x2048

Supported Development Platforms:

Windows: Yes

Mac: Yes
